Re: Revised Part A Application
EPA ID Number KSD007246846

Dear Mr. Trombold:

We have reviewed the revised Notification of Hazardous Waste Activity and Part A permit application forms for Hydrocarbon Recyclers, Incorporated (HRI) which were submitted on October 30, 1987 and the corrections to the forms submitted on November 23, 1987. The forms appear to be complete.

In accordance with 40 CFR 270.72(a) new hazardous wastes codes D002 and F006 have been added to your Part A and may now be stored at your facility.

In accordance with 40 CFR 270.72(b) the proposed increases in the design capacity of the hazardous waste container and tank storage areas is approved. These allowable capacities are not 93,720 gallons of container storage and 158,000 gallons of tank storage.

HRI may begin modification of the facility as we discussed at our November 20, 1987 meeting. However, we would like to meet with you when the details of the facility modifications are finalized to work out any potential problems. We would also like for you to submit the final design drawings to us when they become available so that we may review them before the meeting.

As we discussed at the meeting, you should be aware that Conservation Services, Incorporated is responsible for maintaining financial liability and closure assurance for the facility until HRI has submitted the required forms and has obtained approval from KDHE. HRI must demonstrate compliance with 40 CFR 265 Subpart H requirements within six months of the date of the change in the ownership or operational control of the facility.

If you have any questions, please feel free to call me at (913) 296-1613.

Sincerely yours,

Martin West
